

INSTRUCTIONS *Dancing Robot Puppet*

1. Remove the brads from the card & cut out the paper parts.

2. Fold the SPACER part along the dotted line.
Cut a small wedge into the spacer's side where indicated.

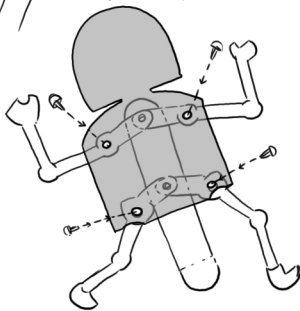

3. Choose a hat for the robot. Run & fasten a brad through the left eye hole of the robot first & then the hat hole.
Fasten a brad through the right eye hole of the robot.

4. Fasten either a drink or giftbox to the robot's LEFT ARM hand hole using a brad.

5. Join LEFT & RIGHT ARM channel holes & the UPPER JOINT-PULL TAB hole with a brad. Use the SPACER inbetween the parts & brad so when the SPACER is removed the joint remains loose.

6. In the same manner above - join the LOWER JOINT-PULL TAB, LEFT & RIGHT LEG with a brad using the SPACER.

7. Spread out the joined parts flat & lay the robot body over. Join the shoulder holes to the LEFT & RIGHT ARM holes with a brad using a SPACER.

TIP* Feel free to visit the website for additional tips, videos, and help.
