

INSTRUCTIONS *Blooming Flower Puppet*

1. Remove the brads from the card & cut out the paper parts.

2. Fold the SPACER part along the dotted line.

Cut a small wedge into the spacer's side where indicated.

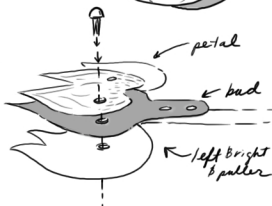

3. Join the PULLER and the tail end holes of the LEFT & RIGHT parts. Use the SPACER inbetween the parts & a brad, so when the SPACER is removed the joint is loose.

4. Match up the PETALS holes over the top BUD holes. Lay them over joined LEFT, RIGHT, & PULLER parts.

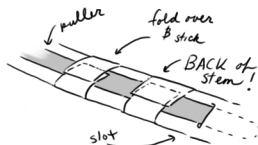

Run a brad through the LEFT empty hole & left side holes of the PETALS, BUD parts & fasten the brad using a SPACER.

Remove the spacer & do the same with the RIGHT empty hole.

5. Lay the STEM over the BUD. Join the remaining empty holes up with a brad.

6. Run the PULLER end through the STEM's slot.

Fold the STEM tabs back over the PULLER. Remove the tape back on the tabs & overlap them so they stick together.

TIP* Fold the petals of the flower slightly forward or back if the puppet movement gets stuck. Feel free to visit the website for additional tips, videos, and help.
